PROFESSIONAL SUMMARY

Growth marketer who builds from zero: as the sole marketer at a pre-seed subscription startup, built the acquisition, attribution, and lifecycle engine that doubled ARR from $200K to $400K in six months. Runs performance marketing across paid and organic channels and builds SQL-based data pipelines and automation with AI agents and MCP integrations. Operations background helping scale a logistics hub from one warehouse to 35+ sites, bridging growth, data, and operations.

PROFESSIONAL EXPERIENCE

King of the Curve, St. Louis, MO (Remote) **June 2023 – September 2025**

Growth Marketer

- Owned end-to-end customer acquisition across paid and organic channels for subscription products on iOS, Android, and web; managed $370K+ in cumulative ad spend across Meta, TikTok, Apple Search Ads, and Google Ads, drove 98K+ attributed installs, and doubled ARR from $200K to $400K in a 6-month peak season (vs. 59% growth in the same season the prior year)
- Created an automated ad monitoring and governance system on the Meta API using AI-assisted development, designing the rules to pause underperforming ads, reactivate on recovery, and trigger Slack alerts on threshold breaches; reduced potential wasted spend by $25K+ and eliminated ~5 hours of manual campaign review per week
- Built 0→1 go-to-market and measurement foundation by developing acquisition and demand generation engine at launch, establishing CRM infrastructure, and defining event taxonomy and performance reporting, enabling consistent attribution, funnel analysis, and lifecycle measurement across marketing and product analytics
- Designed and iterated lifecycle marketing campaigns across email and push notification channels, delivering 520K+ messages, and led website optimization and social media content planning to improve subscriber activation, retention, and subscription conversion, contributing to 43% growth in active subscribers
- Launched partnership programs targeting pre-med audiences, forging relationships with 80+ creators and organizations, securing 22 influencer collaborations to expand audience reach, and delivering qualified leads at an average CPQL of ~$10 across 8 B2B partner campaigns

UniUni Logistics Inc., Carteret, NJ **May 2024 – Present**

Operations Analytics Lead

- Established and scaled operational workflows across induction, sortation, and transportation as employee No. 5 of the East Coast hub, which grew from one warehouse to 35+ sites in two years and became the only profitable region out of 8 in the US; standardized processes used by 100+ employees
- Designed pickup operation system with SQL backend and web-based user interface to replace manual Excel tracking covering ~$450K in monthly costs and 1,500+ trips across 150+ partners; used AI and MCP integrations to build internal tools that standardized partner data intake, automated trip reconciliation and cost validation
- Built automated data pipeline to capture and structure sortation data at ~6.3M monthly volume; performed chute-level hourly analysis to identify bottlenecks and utilization imbalances, increasing daily throughput by 15%; developed volume forecasts and peak-season capacity models to flag operational risks and guide resource and contingency planning
- Launched outbound transfer scheduling and monitoring system for 1,600+ monthly transfers across 40+ cities nationwide; developed weekly lane-level cost and performance analyses tracking on-time performance, load utilization, and costs by city and ZIP code to optimize carrier allocation and linehaul spend
- Owned regional planning and SLA risk visibility for ~550K monthly volume across 200+ drivers in NJ; used geospatial data and route mapping to design delivery zones and balance route coverage; turned API data on delivery rates and inactivity into a flagging process to pinpoint issues before they impacted service levels
